Summary of Letter of Offer

The following is a general summary of certain disclosures and terms of the Issue included in this Letter of Offer and is not exhaustive, nor does it purport to contain a summary of all the disclosures in this Letter of Offer or all details relevant to the prospective investors. This summary should be read in conjunction with, and is qualified in its entirety by, the more detailed information appearing elsewhere in this Letter of Offer, including “*Risk Factors*”, “*Objects of the Issue*”, “*Our Business*” and “*Outstanding Litigation and Defaults*” on pages 20, 47 and 124 respectively of this Letter of Offer.

SUMMARY OF INDUSTRY

Flue-gas desulfurization (FGD) is a set of technologies used to remove sulphur dioxide (SO₂) from exhaust flue gases of fossil-fuel power plants, and from the emissions of other sulphur oxide emitting processes. This process is carried out during combustion in fossil fuel power plants such as coal and oil red combustion units. When coal or oil is burned to produce energy, about 95 percent or more of the sulphur is generally converted to sulphur dioxide (SO₂) under standard temperature conditions. The Ministry of Environment, Forest and Climate Change (MoEFCC), has issued a notification with the objective of reducing emissions of suspended particulate matter (SPM), SO_x, NO_x and mercury at thermal power plants (TPPs). With the MoEFCC order, it has become compulsory to install Flue Gas Desulphurisation (FGD) system in the existing and upcoming thermal power plants to curb SO_x emissions.

In 2015, the Central Government launched the Integrated Power Distribution Scheme (IPDS) with the objective to provide 24/7 power for all. The new Saubhagya Scheme (Pradhan Mantri Sahaj Bijli Har Ghar Yojana) seeks to ensure universal household electrification, that is, in both rural and urban areas. Under this scheme, the identified poor households will get free electricity connections.

ISSUE OF EQUITY SHARES FOR CONSIDERATION OTHER THAN CASH IN THE LAST ONE YEAR

Our Company has not issued Equity Shares for consideration other than cash during the period of one year preceding the date of this Letter of Offer.

SECTION II – RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Letter of Offer, including the risks and uncertainties described below, before making an investment in the Equity Shares. In making an investment decision, prospective investors must rely on their own examination and the terms of the Issue including the merits and risks involved. The risks described below are not the only ones relevant to us, our Equity Shares, the industry or the segment in which we operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may arise or may become material in the future and may also impair our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the sections “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Position and Results of Operations” on pages 56, 63 and 116 respectively of this Letter of Offer. The industry-related information disclosed in this section has been derived from publicly available documents from various sources believed to be reliable, but their accuracy and completeness are not guaranteed and their reliability cannot be assured. Neither our Company, nor any other person connected with the Issue have independently verified the information in the industry report or other publicly available information cited in this section.

This Letter of Offer also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 16 of this Letter of Offer.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless the context requires otherwise, the financial information of our Company has been derived from the Audited Financial Information, prepared in accordance with Ind AS and the Companies Act.

Materiality:

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*
- *Some events may have material impact qualitatively instead of quantitatively; and*
- *Some events may not be material at present but may have a material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another.

In this Letter of Offer, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

INTERNAL RISK FACTORS

- 1. We derive our revenue from EPC Contracts in Dry Bulk Material Handling Systems and in installing Air Pollution Systems through the installation of Flue Gas Desulfurization systems and our financial condition would be materially and adversely affected if we fail to obtain new contracts.**

We are significantly dependent upon the EPC Contracts for our revenue. The revenue generated from our EPC

contracts with customers constitutes 100% of our total revenues for the financial years 2024 and 2023.. We bid for projects on an ongoing basis and EPC projects are typically awarded following a competitive bidding process and satisfaction of prescribed qualification criteria. There can be no assurance that we would be able to meet the eligibility criteria and in addition, we cannot assure you that we would bid where we have been qualified to submit a bid or that our bids, when submitted or if already submitted, would be accepted. Our business, growth prospects and financial performance largely depends on our ability to obtain new contracts, and there can be no assurance that we will be able to procure new contracts. Our future results of operations and cash flows may fluctuate from period to period depending on the timing of our contract. In the event we are unable to obtain new contracts, our business will be materially and adversely affected.

2. Our business is dependent on continuing relationships with our clients and strategic partners.

Our business is significantly dependent on EPC projects undertaken by government agencies and Public Sector undertakings, large Corporate and Government agencies. Our top ten clients vary from period to period depending on the completion schedule of projects. Our top ten clients provided 100%, and 100% of our total EPC contracts and FGD revenue in fiscals 2023 and 2024 respectively. Our business is also dependent on developing and maintaining strategic alliances with our international partners. Our business and results of operations will be materially and adversely affected if we are unable to maintain a continuing relationship or pre-qualified status with certain of our key clients and strategic partners.

3. Our projects are exposed to various implementation and other risks, including risks of time and cost overruns, and uncertainties, which may adversely affect our business, financial condition, results of operations, and prospects.

The construction or development of FGD systems or Bulk Handling Systems involves various implementation risks including delay or disruption in supply of raw materials, delays in acquisition of land by our project clients, unanticipated cost increases, force majeure events, cost overruns, disputes with our joint venture partners, or delays in securing required licenses by our project clients, or making advance payments. We may be further subject to regulatory risks, financing risks and the risks that these projects may ultimately prove to be unprofitable.

Despite the escalation clauses in some of our contracts, our clients may interpret the applicability of the escalation clauses in their favour and we may experience difficulties in enforcing such clauses to recover the costs we incurred in relation to the work performed as per the underlying contract. We may have to bear risks associated with any increase in actual costs for construction activities exceeding the agreed work. Further, while our contracts with our clients have clauses which allow us to seek extension of time for completing our projects, we may for unforeseen reasons, not be able to obtain extensions for projects and thereby face delays or time overruns. While there have not been any instances in the past, where we were not provided extension of time for completion of projects or where penalties were levied on account of delay, however, our project clients may, as per the agreed upon contractual terms, be entitled to invoke penalty provisions and/or terminate the contract in the event of delay in completion of the work if the delay is not on account of any of force majeure clauses or any agreed exceptions. With respect to some of our projects, in the event of termination for any of the aforesaid reasons, we may only receive partial payments under such agreements and such payments may be less than our estimated cash flows from such projects. If any or all of these risks materialize, we may suffer significant cost overruns or time overruns or even losses in these projects due to unanticipated increase in costs as a result of which our business, profits and results of operations will be materially and adversely affected.

4. We propose to conduct a portion of our operations through joint ventures, over which we may have limited control.

Our Company generally seeks to enter into joint ventures and collaborations with the other leading players in the respective fields as part of our efforts to expand our business. Except as otherwise stated in the section titled "Objects of the Issue" on page 47 of this Letter of Offer, there are no definite plans for further investment as of the date of this Letter of Offer though our Company may be required to make additional investments in joint ventures from time to time in line with the business needs of the entities. As with most joint venture arrangements, differences in views among the joint venture participants may result in delayed decisions or disputes. We cannot assure you that our relationships with our joint venture partners can at all times be amicably maintained. We also cannot control the actions of our joint venture partners. These factors could potentially harm the business and operations of a joint venture and, in turn, materially and adversely affect our business and results of operations. Operating through joint ventures in which we are a minority holder results in us having limited control over many decisions made with respect to projects and internal controls relating to projects.

5. We operate in a competitive industry and our failure to successfully compete may adversely affect our business, financial condition and results of operations, and prospects.

Competition is the main threat to most EPC companies, considering the aggressive pricing by the new entrants, changes in technology and markets. Changes in government policy or regulations / legislation etc also brings challenges and treats to the smooth functioning of the Company. As companies recognize the critical role of technology as an enabler to their business, the number of in-house technology centres of large enterprises as well as the number of new entrants in the market increases. The competition from large international and Indian companies is increasing in the domestic market space. Actual results may differ materially from those expressed. The productive life of resources is shrinking and the regulatory requirement in the areas of Air Pollution Control is tightening, thereby increasing the level of investment needed to meet the market requirements. These, while provide huge growth opportunities to your Company, also exposes it to increased competition

As we seek to diversify our regional focus, we may face competition from existing competitors as well as new entrants, who may have better market understanding and reputation in such geographies. These competitive factors may result in reduced revenues, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

6. High Attrition rates and the inability to retain the talent pool is a major challenge to the Company and this may in turn affect the business operations and our revenue.

Since the EPC sector is exposed to high attrition rate due to more opportunities available in market for the employee, retaining existing talent pool and attracting new talented manpower is a major risk to the Company. In the EPC industry, the ability to execute projects, build and maintain client partnerships and to achieve forecasted operating and financial results are significantly influenced by the Company's success in hiring, training and retaining highly skilled Engineering professionals. The market continues to be highly competitive for attracting and retaining Engineering professionals & this is compounded by the ever-changing constraints around talent mobility primarily on account of regulatory requirements and also the evolving value propositions for a range of clients across geographies. We have initiated various measures to enhance the retention of employees during the year which includes, employee engagement surveys, transparent Performance Management System, ESOP etc to maintain employee-friendly culture in the organization. Although we have had an attrition rate of 16%, 20% and 33% in the fiscals 2022, 2023 and 2024 respectively, we may fail to retain the talent pool that we have built over the years and this could adversely affect our operations.

7. We have recently diversified into new areas of business in which we have limited operating history and this inexperience could have a negative impact on our operations.

We have recently ventured into the areas of rural and urban electrification, Security Systems and Artificial Intelligence and Aerospace Business. The experience of our Company and that of our promoters / Directors / Key Managerial Personnel is limited in these areas with no history of successful execution of such projects. Most of our management has little or no experience in these areas, even though they have experience in other types of EPC projects. Our ability to succeed in these new areas may be hampered by unforeseen expenses, difficulties, complications and delays frequently encountered by the commencement of operations of a new business. We cannot assure you that we can manage such projects effectively. Any failure to manage such projects effectively could delay our ability to meet our clients' requirements and delay our ability to generate revenue from such projects, which could have a material adverse impact on our business, financial condition and results of operations.

8. The expansion of our business into Aerospace Engineering is not permitted by our Object Clause of the Memorandum of Association and any corrective action taken by the authorities could have a negative impact on our operations.

We have recently expanded into Aerospace Engineering and entered into a contract with a German Client for executing the same. This is however not permitted by the Object Clause of our Memorandum of Association and we have not taken any shareholder approval for the amendment of the Object Clause either. Although we intend to commence this business only after obtaining shareholder approvals, we may be subject to certain penalties and this could have a negative on our financial condition and our operations.

9. The construction and development of our Air Pollution Systems / Dry Bulk Handling Systems require the services of third parties, including service providers, suppliers and independent contractors, which entail certain risks.

For the purposes of and development of our Air Pollution Systems through FGD or for the dry bulk handling systems, we engage third parties such as architects, engineers, contractors and suppliers of labour and materials. We do not have direct control over the day-to-day activities of such contractors and are reliant on such contractors performing these services in accordance with our expectations and the relevant construction contracts. The time of completion and quality of the projects that we develop depends, in part, on the availability and skill of these third parties, as well as other contingencies affecting them, including labour and raw material shortages and industrial action such as strikes and lockouts. Any consequent delay in project execution could materially and adversely affect our business, prospects, financial condition, and results of operations. Additionally, if a contractor or supplier becomes insolvent, it may be impossible for us to recover compensation for any defective work undertaken or materials supplied, as applicable, by such third parties and we may incur losses as a result of funding the repair of the defective work or products or paying damages to persons who have suffered a loss as a result of such defective work products. Further, customarily, we do not enter into formal long term supply contracts with such third parties. However, any unexpected issues in our relationship with any such third party may require us to source services or materials from alternate sources, which we may not be able to do in a timely manner or on commercially viable terms, if at all, which may adversely affect our business and results of operations.

10. We are required to renew, maintain or obtain statutory and regulatory permits, licenses and approvals for our operations from time to time. Any delay or inability to obtain such approvals may have an adverse impact on our business.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We have made renewal applications for certain approvals or licenses that have expired. If we fail to obtain necessary approvals we require to operate, or if there is any delay in obtaining these approvals, our business and financial condition may be adversely affected. Further, these permits, licenses and approvals are subject to several conditions, and there is no assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to cancellation, revocation or suspension of relevant permits, licenses or approvals. Any interruption of our operations caused by our statutory and regulatory permits, licenses and approvals could adversely affect our business, prospects, financial condition and results of operations.

11. Our business is working capital intensive involving relatively long implementation periods. We require substantial financing and bank guarantees for our business operations. Our indebtedness and the conditions and restrictions imposed on by our financing arrangements could adversely affect our ability to conduct our business.

Typically, projects in the EPC sector which we undertake are working capital intensive in nature, require bank guarantees, and involve long implementation periods. This requires us to obtain financing through banks and various other means. Our ability to secure new business is directly impacted by our ability to post bank guarantees. As on March 31, 2023, our total current borrowings stood at ₹8,609.88 lakhs and as on March 31, 2024 our total current borrowing stood at ₹9,676.36 lakhs. We may incur additional indebtedness in the future. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact our Equity Share price. Our inability to provide bank guarantees or adequate working capital will adversely impact our growth of business and operations.

Our working capital requirements may be affected due to factors beyond our control including force majeure conditions, delay or default of payment by our clients, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

In the last three (3) financial years our Company has been able to raise additional working capital funding from bank as and when the need has arisen and has never delayed and defaulted its financial commitments. However, any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credit facilities, acceleration of amounts due under such facilities and cross-defaults under certain of our other financing agreements, any of which may adversely affect our ability to conduct our business and have a material adverse effect on our financial condition and results of operations. We cannot assure you

that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our planned capital expenditure, our business, results of operations and financial condition.

12. We have entered into, and will continue to enter into, related party transactions.

We have in the course of our business entered into transactions with related parties. While we believe that all such transactions have been conducted on an arms-length basis and in accordance with the applicable laws, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have adversely affect our business, prospects, financial condition and results of operations.

For details regarding our related party transactions as per Ind AS 24 entered into by our Company in Fiscals 2023 and 2024, please see “*Financial Statements*”—*Related party transactions*” on page 107 of this Letter of Offer

14. We have not been paying dividends in the past and our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. We have not paid dividends in the past and there can be no assurance that our Company will declare dividends in the future also.

15. Our promoter will continue to retain significant shareholding in our Company after the issue, which will enable them to exercise significant control over us.

After the completion of the Issue, our Promoter, will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and affect the outcome of shareholder voting. As a result, our Promoter may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders.

22. There have been certain observations in the secretarial audit report issued by our secretarial auditor in the recent past.

The occurrence of such non-compliances or continued qualifications in the audit reports in future may impact our results of operations and financial position.

23. The Audit Report issued by our Statutory Auditors for the year ended March 31, 2024 has Emphasis of Matter

The Audit Report issued by our Statutory Auditors for the year ended March 31, 2024 has the following Emphasis of Matter:

“The Company has made investments in equity shares of a private limited company aggregating to Rs. 500.00 lakhs as on March 31, 2024 reported under Investments in Non-Current Assets. The investments are to be measured at fair value in the statement of financial position as per requirements of Indian Accounting Standard 109. However, keeping in view their long-term business synergy and potential, the management has been decided to value such investments at cost for the year ended March 31, 2024.

Our opinion is not modified in respect of this matter”

24. We may infringe on the intellectual property rights of others.

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we or our technology providers are infringing upon any existing third-party intellectual property rights which may force us to alter our technologies, obtain additional licenses or significantly cease some portions of our operations. We may also be susceptible to claims from third parties asserting infringement and other related claims. Regardless of whether such claims that we or our technology providers are infringing patents or other intellectual property rights have any merit, those claims could adversely affect our relationships with current or future clients, result in costly litigation, divert management’s attention and resources, subject us to significant liabilities, require us to enter into additional royalty or licensing agreements or require us to cease certain activities.

An adverse ruling arising out of any intellectual property dispute could subject us to significant liability for damages, prevent us from using technologies or developing products, or require us to negotiate licenses to disputed rights from third parties. Although patent and intellectual property disputes in the technology area are often settled through licensing or similar arrangements, costs associated with these arrangements may be substantial and could include license fees and ongoing royalties, which could be prohibitively expensive. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. Any of the foregoing could materially and adversely affect our business, results of operations and financial condition.

25. Our registered office from which we operate is not owned by us.

We do not own the property but have taken the property on which we have our registered office on a lease from MIDC. In case the lease agreement is not renewed on terms and conditions acceptable to us or at all at the end of the lease period, we may suffer a disruption in our operations. For further details, see the section titled “Our Business – Properties” on page 73 of this letter of Offer.

26. The management of our Company is dependent upon our senior management, directors and key personnel.

We operate in an industry where the quality of our people is a critical asset. We benefit significantly from the vision, strategic guidance, experience and skills of several key members of our management team, which includes our Promoter, supported by the skills, efforts, expertise, continued performance and motivation of our Key Management Personnel, and other personnel. If any of our Promoter, Key Management Personnel cease to be associated with our Company and we fail to recruit suitable replacements in a timely manner, our ability to manage our growth and our business, results of operations and prospects may be adversely affected.

27. Insurance coverage has not taken by our company, as a result of which the loss or destruction of our assets could have a material adverse effect on our financial condition and results of operations.

While we believe that the insurance policies taken by us are adequate, they may not be sufficient to cover all the risk involved. Such insurance policies are taken on the basis of estimated period of completion of the project and estimated costs and other projections. However, we cannot assure you that our company recover all our losses in case of any damage or adverse event. We may face uninsured risks to the extent of remaining assets of the company. Further, if we may suffer any losses, damages and liabilities in the course of our operations and in our project development. Any such uninsured losses or liabilities could result in a material adverse effect on our business operations, financial conditions and results of operations. Further, we may not carry insurance coverage for all our projects. We may have to bear the costs associated with any damage suffered by us in respect of these uninsured projects or uninsured events.

28. Conflict of interest may arise out of common business / similar business activities shared by our Company and our Promoter Group.

Some of our Group Entities and other entities in the Group are in the EPC Business. As a result, there may be conflict of interests in allocating business opportunities between us and our Group Entities / other entities in the Group. We have also note entered into any non-compete agreements with any of our group entities. This could lead to a loss of business opportunity to our company and in turn could have an adverse effect on our revenues and results of our operations.

29. We face foreign exchange risks that could adversely affect our results of operations and cash flows.

A portion of our total revenue from operations is denominated in currencies other than Indian Rupees. We monitor our exposure to foreign currencies and selectively enter into hedging transactions in an attempt to reduce the risks of currency fluctuations. However, these activities may not always be sufficient to protect us against incurring potential losses if currencies fluctuate significantly. Although we did not experience losses due to any failure to hedge foreign exchange risks in the past three Financial Years and the nine-month period ended December 31, 2023, we cannot assure you that this will not occur in the future. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations and cash flows.

30. Our Company has availed unsecured loans from related parties, which are recallable in nature.

As on March 31, 2024, our Company has outstanding unsecured loans aggregating to ₹ 3,732.56 lakhs, which have been extended by our Directors / Promoter which are recallable in nature and can be recalled at any time by them. We cannot assure you that the lenders will not demand repayment of the unsecured loans extended to us. In the event, the lenders seek a repayment of any these unsecured loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to carry out the operations or complete our ongoing operations. Therefore, any such demand may adversely affect our business, financial condition and results of operations.

31. We are a listed company and are required to comply with rules and regulations imposed by the Stock Exchanges and SEBI with respect to continuous listing and the Companies Act. Any failure to comply with such rules and regulations or any wrong disclosure made to the Stock Exchange or any statutory authority could result in penalties being imposed on us, which may adversely affect our business and operations.

As a listed company, we are required to comply with certain conditions for continuous listing under the SEBI Listing Regulations and other rules and regulations imposed by SEBI, which require us to make certain periodic disclosures, including disclosures about any material events or occurrences with respect to our Company, disclosure of our financial statements and disclosure of our updated shareholding pattern. Any failure to comply with these continuous disclosure requirements or any wrongful disclosure made by us to the Stock Exchange or any other statutory authority may lead to penalties being imposed on us.

We believe, we are in compliance with rules and regulations imposed by the BSE and SEBI with respect to continuous listing, any failure to comply with such rules and regulations or any wrong disclosure/ Non filing to the BSE or any statutory authority could result in penalties being imposed on us, which may adversely affect our business and operations.

32. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by a public financial institution or a scheduled commercial bank and our management will have broad discretion over utilization of the Net Proceeds.

Our Company proposes to utilize the Net Proceeds for working capital requirements and general corporate purposes. Our proposed deployment of Net Proceeds has not been appraised by a public financial institution or a scheduled commercial bank and is based on management estimates. Our management will have broad discretion to use the Net Proceeds. Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. We cannot assure you that use of the Net Proceeds to meet our future capital requirements, fund our growth and for other purposes identified by our management would result in actual growth of our business, increased profitability or an increase in the value of our business.

33. The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.

As the Issue size is not more than ₹10,000 lakhs, under Regulation 82 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same.

34. We are subject to cyber security risks and security breaches and may incur increasing costs in an effort to minimize those risks and to respond to cyber incidents.

A number of other companies have disclosed cyber-attacks and security breaches, some of which have involved intentional attacks. Attacks may be targeted at us, our customers, or both. Although we devote significant resources to maintain and regularly upgrade our systems and processes that are designed to protect the security of our computer systems, software, networks and other technology assets and the confidentiality, integrity and availability of information belonging to us and our customers, our security measures may not provide absolute security. Despite our efforts to ensure the integrity of our systems, it is possible that we may not be able to anticipate or to implement effective preventive measures against all security breaches of these types, especially because the techniques used change frequently or are not recognized until launched, and because cyber-attacks can originate from a wide variety of sources, including third parties outside the Company such as persons who are involved with organized crime or associated with external service providers or who may be linked to terrorist organizations or hostile foreign governments. A successful penetration or circumvention of the security of our systems could cause serious negative consequences, including significant disruption of our operations, misappropriation of our confidential information or

that of our customers, or damage to our computers or systems or those of our customers and counterparties, and could result in violations of applicable privacy and other laws, financial loss to us or to our customers, loss of confidence in our security measures, customer dissatisfaction, significant litigation exposure, and affect to our reputation, all of which could have a material adverse effect on us.

Our servers are also vulnerable to computer viruses, physical or electronic break-ins, and similar disruptions. We may need to expend significant resources to protect against security breaches or to address problems caused by breaches. Security breaches, including any breach of our systems or by persons with whom we have commercial relationships that result in the unauthorized release of customers' or businesses' personal information, could damage our reputation and expose us to a risk of loss or litigation and possible liability.

35. Failure to stay up to date with technological changes, as well as the uses and regulation of the internet, might be detrimental to our Company.

The industry is very dynamic and fresh. We must keep up with changing technical breakthroughs, customer and small company usage habits, internet security threats, system failure or inadequacy hazards, and governmental regulation and taxation, all of which could have a negative influence on our entity.

If we are unable to adequately react to such developments, decreased demand for our products could result in a loss of revenues or a fall in profitability. The demand for our products could fall as a result of a variety of factors, including regulatory restrictions that limit customer access to specific products, the availability of competing or alternative products, or changes in customers' financial circumstances, such as increases in income or savings. Our revenues could be severely reduced if we fail to adjust to a significant change in our clients' desire for, or access to, our products. Customers may refuse or reject products whose changes make them less appealing or less available, even if we make adjustments or launch new products to meet customer demand.

36. The COVID-19 pandemic has had, and may in the future continue to have, and any similar pandemic situations that may arise in the future, may have a material adverse impact on our business, results of operations, financial condition and cash flows.

The global spread and unprecedented impact of the ongoing COVID-19 pandemic continues to create significant volatility, uncertainty and economic disruption. The pandemic has led governments and other authorities around the world to implement significant measures intended to control the spread of the virus, including lockdowns, shelter-in-place orders, social distancing measures, business closures or restrictions on operations, quarantines, travel bans and restrictions and multi-step policies with the goal of re-opening these markets. These responsive measures have severely disrupted economic and commercial activity tied to the production and sale of goods, which have impacted supply chains and routes, and, as a result, supply chain companies such as ours have experienced uncertainty and volatility. The scope, duration, and frequency of the measures implemented and the adverse effects of COVID-19 remain uncertain and could be severe. If COVID-19 infection rates resurge and the pandemic intensifies and expands geographically, its negative impacts on our business, operating expenses, gross profit and gross margin could be more prolonged and may become more severe.

37. We have not commissioned an industry report for the disclosures made in the chapter titled "Industry Overview" and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled "Industry Overview" of this Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Letter of Offer. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

EXTERNAL RISK FACTORS

38. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and IFRS, which investors may be more familiar with and consider material to their assessment

of our financial condition.

Our audited summary statements of assets and liabilities as at March 31, 2024 and audited summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Financial Year 2024 have been prepared in accordance with the Ind AS, read with the Ind AS Rules.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Audited Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

39. Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

40. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

41. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

42. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

43. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

44. Any downgrading of India’s debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India’s credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

45. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions including wars amongst nations like the current Russia Ukraine conflict could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

ISSUE SPECIFIC RISKS

46. Our Company will not distribute the Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.

Our Company will dispatch the Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the “**Offering Materials**”) to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e- mail. Presently, there is a lack of clarity under the Companies Act and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

47. SEBI has by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021 and October 01, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021 and October 01, 2021 and ensure completion of all necessary steps in relation to providing/ updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 135 of this Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company namely “ Ducon Infratechnologies Limited-Rights Issue Escrow Entitlement Demat Account”, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

48. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncee(s) may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncee(s) prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

49. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if STT was paid on the sale transaction and, additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on long-term capital gains arising from sale of equity shares. However, where specified conditions are met, such long-term capital gains are only taxed to the extent they exceed Rs. 100,000.00 and unrealized capital gains earned up to January 31, 2018, continue to be exempt. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity Shares.

50. You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

51. There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchange until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

52. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, 2013, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

53. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

54. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

55. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

SECTION IV – ABOUT THE COMPANY

Industry Overview

Indian Economy

Introduction

Strong economic growth in the first quarter of FY23 helped India to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices (2011-12) in the first quarter of 2023–24 is estimated at Rs. 40.37 trillion (US\$ 484.94 billion), showing a growth of 7.8% as compared to the first quarter of 2022-23 estimated at Rs. 37.44 trillion (US\$ 449.74 billion). Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In 2023-24 (April-September), India's service exports stood at US\$ 164.89 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-September) were estimated at US\$ 376.29 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 301.75 trillion (US\$ 3.62 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q1 of 2023-24 was Rs. 70.67 trillion (US\$ 848.92 billion), as against Rs. 65.42 trillion (US\$ 785.85 billion) in 2022-23, estimating a growth of 8%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) decreases to US\$ 9.2 billion in Q1 of 2023-24 from US\$ 17.9 billion in Q1 of 2022–2023.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown.

The Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India

ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Engineering Procurement & Construction – Heavy Engineering

Large-scale infrastructure and industrial projects are the focus of the Engineering, Procurement, and Construction (EPC) industry, which is an all-inclusive and integrated project delivery approach. EPC guarantees a smooth and effective completion of the project by covering every stage of its lifecycle, from conception and design to material procurement and construction.

India has a strong engineering and capital goods market. Engineering is India's largest industrial segment and accounts for nearly 3-4 per cent of the country's economy and employs more than 4 million skilled and semi-skilled workers. Further, Private Industrial Capex appears to be getting into a whole new cycle after the pandemic hiccup – this time around armed with a new set of growth drivers. Also, large players in metals and cement, where utilisation levels are elevated and balance sheets healthy, will continue on their capex plans (brownfield in near term and greenfield in medium to long term). Large business houses with healthy financial standing are have also

entered into MOUs with the State Governments to enter the segment with green field projects.

Flu-Gas Desulfurization – Analysing India’s prominence

A study by the National Institute of Health estimates that around **2 million** deaths occur annually due to chronic respiratory diseases. Long exposures to outdoor air pollution and the toxic effects of biomass fuel are the major risk factors. Thus, an ongoing surge in emissions drives the demand for **flue gas desulfurization** across several industries like iron and steel, cement production, and power generation. Triton’s report estimates that the Global Flue Gas Desulfurization Market is likely to advance with a CAGR of **4.93%** over the forecast years **2023-2030**. The pollution levels are rising, especially in emerging countries within Asia-Pacific. Due to rapid industrialization, coal combustion has become a huge source of sulfur dioxide (SO₂) emissions. This boosts the demand for FGD systems. Accordingly, *our analysis suggests that the Asia -Pacific flue gas desulfurization market is expected to witness the fastest growth at 5.42% CAGR during the forecast period 2023-2032.*

Several governments have introduced stringent regulatory norms primarily centered on deploying these systems to target air pollution. With a sustainable energy vision, India has emerged as a major contender within the Asia-Pacific region.

Let’s dive deeper into examining the factors that derive its prominence.

India: Emerging Hub in Flue Gas Desulfurization Market

Mitigating Pollution Levels on Priority

As per Greepeace (an environmental NGO), India is the largest emitter of SO₂ in the world. It is contributing more than 15% of global anthropogenic emissions. Thus, it becomes imperative for India’s coal-based thermal power plants to adopt FGDs. In this regard, wet FGD systems are highly effective in removing sulfur dioxide and other pollutants from flue gases.

Given the rising prominence, Leading Power produces are in the process of installing FGD system to reduce the pollution. Reputed business house like, Adani Group have placed order worth ₹6,163.20 crore for 5 FGD projects with Power Mech Projects Ltd in 2022. These projects are to be implemented at the coal-based power plants over the next 30 months. In order to achieve compliance with emission standards and mitigate the environmental impact of sulfur dioxide emissions, the market for flue gas desulfurization is rising.

With robust growth witnessed in the Indian economy, huge capacity addition and new green field projects in never seen earlier volume are being added in the Power Sector which by default have to come with FGD systems as per the regulatory norms.

Government’s Regulatory Push

The government has focused on reduction of emissions from coal-based thermal power plants in accordance with the Intended Nationally Determined Contributions (INDCs) submitted to the United Nations Framework Convention on Climate Change (UNFCCC) that has committed to curb emission intensity of its economy by 30-35 per cent from the 2005 level by 2030. The Union Environment Ministry in India specified stringent emission norms for coal-based power plants in December 2015. Adhering to them, a large number of India’s coal power plants aimed to install FGDs by 2022. However, less than 8% of those plants have successfully adopted these solutions, which led to an issuance of latest Notification extension of the deadline until December 2027.

The Ministry of Environment, Forest and Climate Change (MoEFCC), has issued Notification No: G.S.R. 682 (E) titled 'Environmental (Protection) Second Amendment Rules, 2022 dated 5th September 2022 with the objective of reducing emissions of SO₂ at thermal power plants (TPPs). This Notification has categorised the Thermal Power Plants into Three groups based on the Location /Area and fixed timelines for compliance for SO₂ emission as Dec 2024, Dec 2025 and Dec 2026 respectively. The non-complying units have to be retired. Until then the Non-compliant units have to pay Environmental Compensation ranging from 0.20 paise to 0.40 paise per unit. The above Notification has left the power industry no other option but to go for Air Pollution Control Systems (FGD).

(Source : Company Annual Report for the Financial Year ended March 31, 2023)

According to projections by the Indian Ministry of Environment, Forest and Climate Change (MoEFCC), 161,522 MW of thermal plants are expected to install retrofitted FGD systems to reduce SO_x emissions. This is expected to drive the FGD market revenue growth over the forecast period.

Abundance of Raw Material

Limestone is the primary material required for FGD systems in power plants. India owns around **282** coal power plants, for which high-quality limestone (CaCO₃ > 90%) is desirable. This fine-quality limestone is already being produced by India, especially for the *steel and chemical industries*.

Interestingly, *India is one of the largest producers of limestone in the world*, with **27%** of the total resources found in Karnataka. Annually, the nation produces **338** million tonnes of limestone. As per CSE, a rough estimate shows that a **500 MW** plant will need about **32,000 – 40,000** tonnes of limestone annually, which costs around **₹3 – ₹4 crore**. As a majority of power plants are also located within **200 km** of a limestone mine, accessibility becomes less challenging. Therefore, resource abundance and regional distribution significantly indicate the ease of FGD installation.

Extensive utilisation of byproduct

One of the multiple benefits offered by deploying limestone is the generation of **gypsum** as a key byproduct of FGD systems. Since it is a scarce resource in India, the adoption of FGD enables India's power plants to produce about **12 – 17 million tonnes** of gypsum. This will reduce the import burden and facilitate the use of synthetic gypsum. It will also help to meet the domestic demand for gypsum as an integral component of cement production. In the long term, power plants can, therefore, offset the cost of limestone by utilizing all the FGD gypsum produced or by selling it.

Future Prospects : Advancements in FGD Technology

The need for flue gas desulfurization systems is witnessing a significant expansion due to several advancements by major Indian manufacturers like GE Power, Mitsubishi Power LTD, and Tata Consulting Engineers Limited. Technologies such as fuel switching, boiler modernization, catalytic convertors, fluidized bed combustion, etc, are used to mitigate SO₂ emissions. In the evolving industrial landscape, the application of multi-pollutant technologies to control pollutants is essential. This also paves the way for stakeholders to explore opportunities emerging in the FGD market.

(<https://blogs.tritonmarketresearch.com/flue-gas-desulfurization-analysis>)

MARKET PERFORMANCE – DRIVERS, CHALLENGES, AND OPPORTUNITIES

The market is driven by several key factors, including stringent environmental regulations, growing public awareness regarding environmental sustainability, and health concerns fostering a demand for cleaner air and reduced pollution. Moreover, the expansion of the power generation and industrial sectors, particularly in emerging economies, amplifies the need for efficient FGD systems. Additionally, economic incentives, technological advancements, and the pursuit of sustainable energy solutions further boost the FGD market. The burgeoning global population and expanding industries necessitate a higher production of electricity, often reliant on coal-fired power plants. However, coal combustion is a significant source of sulfur dioxide emissions. To mitigate environmental damage and comply with stringent emissions regulations, the implementation of flue gas desulfurization systems becomes imperative, ensuring sustainable energy production.

On the other hand, high initial and operational costs associated with implementing FGD systems limit the market's growth. The substantial investment required for the installation and maintenance of FGD technologies can deter companies, especially smaller enterprises, from adopting these systems. Additionally, the complexity of integrating these systems into existing industrial infrastructures and the need for skilled personnel to operate and maintain these systems contribute to cost challenges.

Nevertheless, flue gas desulfurization (FGD) gypsum, a by-product of coal-fired power plants, is increasingly being recognized for its role as a valuable soil conditioner, creating significant opportunities for the market. FGD gypsum, due to its high calcium and sulfur content, exhibits the ability to enhance soil quality by improving aggregation, reclaiming sodic soils, and increasing water penetration. This environmentally and economically viable approach boosts soil quality and encourages crop production, aligning with sustainable agricultural practices. As the demand for FGD gypsum grows and more businesses invest in FGD systems, the market for this versatile soil conditioner is expected to expand, offering valuable advantages for agriculture and environmental sustainability.

In December 2014, the Ministry of Power launched the Deen Dayal Gram Jyoti Yojana (DDGJY) which subsumed RGGVY. The main object of the scheme was to ensure 100% rural electrification in a targeted manner. It also involved improving sub-transmission and distribution infrastructure in rural areas.

In 2015, the Central Government launched the Integrated Power Distribution Scheme (IPDS) with the objective to provide 24/7 power for all. One of the flagship programmes of the Ministry of Power, IPDS aims at strengthening of sub-transmission network, and also the metering, IT application, Customer care services and the completion of the ongoing works of Restructured Accelerated Power Development and completion of the Reforms Program (RAPDRP). The new Saubhagya Scheme (Pradhan Mantri Sahaj Bijli Har Ghar Yojana) seeks to ensure universal household electrification, that is, in both rural and urban areas. Under this scheme, the identified poor households will get free electricity connections.

Business Overview

Ducon operates in five business Segments:

1. Clean Energy – Flue Gas Desulfurization
2. Engineering Procurement and Construction – Dry Bulk Handling Equipment
3. Rural and Urban Electrification
4. Video Security Surveillance solutions through Artificial Intelligence and
5. Aerospace Engineering

On 7 December 2015, the Government published new environmental norms for coal-based power plants. The regulations aimed to drastically cut down emissions of particulate matter (PM), sulphur dioxide (SO₂) and oxides of nitrogen (NO_x) and bring them closer to international standards. With the new tighter air emissions regulations, the current installed capacity of 230 GW of coal thermal power plants in India have started to install the required Flue Gas Desulphurization (FGD) systems to meet the new clean air standards requiring an investment of thousands of crores in FGD plant installations. As of date, the FGD orders for only 50 GW have been placed and the remaining 180 GW power plants intend to place their orders in the coming years.

We are a FGD supplier in the Indian market and have a successfully operating limestone FGD system for more than 5 years in India. Among the Company’s many successfully operating FGD installations in India, the notable ones include: (i) 500 MW seawater FGD systems at Dahanu power plant and (ii) 2x550 MW Limestone FGD system at Udupi Power Plant.

We are a rapidly growing Fossil Fuel/Coal Clean Technology Company at the forefront of bringing Fossil Fuel Clean Technology/Green Fossil Fuel Technology to India’s transformation to Green Energy. Ducon has diversified technologies and operates in a variety of business segments, to provide solutions and meet challenges in the infrastructure, FGD systems and material handling sectors. In the infrastructure sector, Ducon provides complete FGD systems in thermal power plants, and provides bulk material handling systems for Alumina, fly ash handling systems and electrification projects. We are a medium size EPC company in the field of Air Pollution Control, Flue Gas Desulphurization (FGD) Systems in India, Wet Scrubbers, Bag Filters, Cyclones. Material Handling Systems (Belt Conveyor Systems, Pipe Conveyor System, Pneumatic Conveying System, Air Slides, Silo Systems), and Rural Electrification.

1. Flue Gas Desulfurization

Globally, Ducon has supplied wet FGD systems on over 20,000 MW of combined power plant capacity. Ducon FGD systems can achieve over 99% sulphur dioxide removal efficiency. Ducon Flue Gas Desulfurization systems can also recover up to 90% of oxidized mercury in the flue gas. Ducon caters to the industry with its multiple FGD technologies like Wet Lime, Sea Water, Dry, etc.

Depending upon the reagent utilized, Ducon can select a packed tower, a spray tower or a Ventri-Rod Absorber (VRA™) (a proprietary Enviroengineering unit) for the wet FGD application. For Dry Flue Gas Desulfurization systems, Ducon uses its proprietary two- fluid nozzle DRX-25 to atomize feed slurry in the spray reactor. Ducon can also provide a Circulating Reactor Dry FGD System suitable for applications of upto 3% sulphur coal and by utilizing dry lime, it can provide upto 97% SO₂ removal efficiency. Ducon provides either bag house filter or Electrostatic Precipitator for duct collection downstream. Ducon works with reputable vendors to provide Gas-to-Gas heat exchangers, fans, controls, and reagent handling & feeding systems.

DUCON, being pioneers of FGD in India, is better placed than anybody else to grab the opportunities in the current scenario. Considering the massive influx of FGD tenders, DUCON has decided to capitalize on the maximum FGD project opportunities by either sole bidding on smaller & medium sized projects or joint bidding with another reputable EPC company on large FGD projects. With this strategy, DUCON has been bidding on extensive number of FGD projects both small and medium size projects independently and large projects via joint bidding. Ducon has the capability to provide a complete global turnkey installation including effluent treatment systems.

Milestone Projects

(India's first Sea water FGD system with 100% of flue gas, for 2 X 250 MW Dahanu Termal Power Station at Dahanu, Maharashtra, India installed by Ducon)

FGD System is the core business of Ducon. Ducon has complete range of Air Pollution Control Systems to remove

particulate matter and gaseous pollutants. This is an Air Pollution Control system which helps Thermal Power Plants and the captive Power plants of other industries to remove sulphur dioxide in Coal **and Oil fired** Boilers. Under this system, the Flue Gas after burning of Coal or Oil is taken through the FGD system for Pollution control before releasing it to the air through the Chimneys.

DUCON has pioneered the FGD system in India and is still regarded as the leader. Following are the milestones achieved by DTIPL in India.

- ❖ *DUCON has installed India's first Sea water FGD system with 100% of flue gas, for 2 X 250 MW Dahanu Thermal Power Station for Reliance Energy Ltd, Dahanu, Maharashtra, India. This unit consistently ranks among the cleanest as well as the most reliable power generating station in India. This project also disproved the notion that energy production and environmental protection are mutually exclusive.*
- ❖ *DUCON is also credited with providing India's first Wet limestone FGD system on coal fired power plant with production of saleable Gypsum for 2 x 600 MW Udupi Thermal Power Station, Karnataka, India. Today this unit has become benchmark installation for those desirous of installing FGD systems in India.*
- ❖ *India's first ever Dual Alkali Scrubber is provided by Ducon*

- **India's first FGD in Battery Breaking unit at Haldia, West Bengal.**

Process

Flue-gas desulfurization (FGD) is a set of technologies used to remove sulphur dioxide (SO₂) from exhaust flue gases of fossil-fuel power plants, and from the emissions of other sulphur oxide emitting processes. This process is carried out during combustion in fossil fuel power plants such as coal and oil red combustion units. When coal or oil is burned to produce energy, about 95 percent or more of the sulphur is generally converted to sulphur

dioxide (SO₂) under standard temperature conditions.

FGD can be characterized into wet & spray dry scrubbing, wet sulfuric acid process, SNOX flue gas desulfurization and dry sorbent injection system based on methods of desulfurization. Most FGD systems employ two stages: one for fly ash removal and the other for SO₂ removal. In wet scrubbing systems, the flue gas normally passes first through a fly ash removal device, either an electrostatic precipitator or a baghouse, and then into the SO₂-absorber. However, in dry injection or spray drying operations, the SO₂ is first reacted with the lime, and then the flue gas passes through a particulate control device. Another important design consideration associated with wet FGD systems is that the flue gas exiting the absorber is saturated with water and still contains some SO₂. These gases are highly corrosive to any downstream equipment such as fans, ducts, and stacks.

Two methods that may minimize corrosion are: (1) reheating the gases to above their dew point, or (2) using materials of construction and designs that allow equipment to withstand the corrosive conditions. Both alternatives are expensive. Engineers determine which method to use on a site-by-site basis. Wet FGD systems are widely used in comparison to dry FGD and are expected to maintain dominance over the forecast period owing to high efficiency and low maintenance.

2. Dry Bulk Handling System

The correct storage, extraction and the selection of suitable transportation systems is becoming increasingly important for power plant owners. This is particularly of great significance wherever a high service life, few to no interruptions, high through puts and the lowest possible power consumptions are in demand.

(India's Largest Material Handling system in an Aluminium Smelter at Sambhalpur, Orissa, India, installed by Ducon)

Bulk Material Handling System is the second big business segment of DUCON. The system involves automatic handling, transportation, loading and unloading of dry materials like Fly Ash, Alumina, Coal, Limestone etc. This caters to the requirements of the industries in Power sector, Alumina, Iron Ore, Petroleum, Cement and other similar sectors.

DUCON has broad knowledge base and system reference for various kinds of Bulk Material Handling Systems like;

- Alumina Handling Systems
- Coal Handling Systems
- Limestone Handling Systems
- Tanker and Rail Wagon Loading and Unloading Systems
- Sile Loading and Unloading Systems
- Bins and Silo Aeration Systems
- Pneumatic Conveying Systems

DUCON has executed several projects of Bulk Material Handling Systems throughout India.

The efficient storage, extraction, and selection of suitable transportation system is paramount to industries. This is particularly of great significance wherever a high service life, few to no disruptions, high through put of bulk materials is paramount in industries spanning agriculture, mining, construction, and manufacturing. It's the linchpin of maintaining product quality, optimizing processes, and curbing operational costs. From groundbreaking materials and intelligent monitoring systems to sustainable solutions and space-efficient designs, these advancements are revolutionizing how we store and manage bulk materials.

Ducon with its technology specializes in the Design, supply, installation of complete turnkey facilities for Bulk Material Handling and Pneumatic Conveying Systems. Ducon supplies systems to unload, store, reclaim, weigh and sometimes process materials of all kinds of Power, Cement, Steel, Alumina, Chemical and Petrochemical industries. Where there is a product to move, Ducon has the product to move it. The various types of bulk handling systems are :

- Pneumatic Conveying Systems (Lean and Dense Phase)
- Mechanical conveying systems
- Discharge systems for Silos and Hoppers
- Process of Bulk materials (Crushing and Grinding)
- Big bag filling and discharge systems
- Transshipment systems (Rail Wagon and Tanker Loading and Unloading system)

Types of Bulk Handling Systems

Ash handling systems for Power Generation Industry: The industry's main applications are the removal of ash from boiler and filter systems. Course ash / Fly ash collected at Economizer / Air Pre Heater / Duct Hoppers / ESP hoppers is pneumatically conveyed to intermediate silos and to remote silos. Ducon has the capability and technology to design the most efficient dense phase conveying system with capacity as high as 300 TPH and conveying distance in excess of 1500m.

DU-PUMP system: Ducon offers pressure pneumatic conveying system for conveying of various powdery material like Cement, Clinker dust, Sand, Coal, Alumina, Bentonite, Fly ash etc. DU-PUMP systems can operate at higher air to solid ratios and it has many advantages like positive pressure system, low velocity, less erosion of pipes and bends.

DU-SLIDE conveyors: DU-SLIDE Conveyors are used to convey the material from one point to another via air. It is ideal for materials such as Fly Ash, Cement, Hydrated Lime, Alumina, Barites and Flour etc. The aeration of the material causes it to act like a fluid and gently slide along the gradual slope of the slide.

DU-SILO Fluidizer: Ducon provides material extraction systems for at bottom and conical bottom silos for using reverse fluidized cones and open- top-slide conveyors. The centre cone is fluidized constantly whereas the radial side conveyors on silo bottom are operated sequentially for systematic extraction of material from silo.

As an EPC company, Ducon has executed multiple Dry Bulk Material Handling systems over the last One decade.

Alumna & Material Handling System

3. Rural and Urban Electrification

Ducon is executing Rural Electrification under DDGJY scheme and Urban Electrification under IPDS scheme. This is the new segment which Ducon has diversified into. The projects involve, Construction of new 33 / 11KVA sub-stations, Augmentation of 33/11KVA sub-stations, New 33 KV lines, New 11 KV lines, Metering, etc. We plan to expand the volume of this segment in future.

Competition

Competition is the main threat to most EPC companies, considering the aggressive pricing by the new entrants, changes in technology and markets. Changes in government policy or regulations / legislation etc also brings challenges and treats to the smooth functioning of the Company. As companies recognize the critical role of technology as an enabler to their business, the number of in-house technology centres of large enterprises as well as the number of new entrants in the market increases. Since the EPC sector is exposed to high attrition rate due to more opportunities available in market for the employee, retaining existing talent pool and attracting new talented manpower is a major risk to the Company. Emphasis of Matters

- i) The Company has made investments in equity shares of a private limited company aggregating to Rs. 500.00 lakhs as on March 31, 2024 reported under Investments in Non-Current Assets. The investments are to be measured at fair value in the statement of financial position as per requirements of Indian Accounting Standard 109. However, management is of the opinion, keeping in view their long term business synergy and potential, it has been decided to value such investments at cost for the year ended March 31, 2024.

Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

- 1) Evaluation of uncertain tax liabilities (Contingent Liabilities). Refer Note No.22.1 forming part of financial statements. Considering its probable impact on profit / loss, we have considered this as Key Audit Matter.

We have performed following substantive audit procedures:-

- Obtained details of completed tax assessments and demands up to the year ended March 31, 2024 from management.
- We performed our internal procedures to analyse the management's underlying assumptions in estimating the tax provision and the possible outcome of the disputes.
- We also legal precedence, referred to various case laws and other rulings in evaluating management's position on these uncertain tax litigations.
- Additionally, we considered the impact of latest information in respect of uncertain tax positions as on March 31, 2024 to evaluate whether any change was required to management's position on these uncertainties.

Information Other than the Financial Statements and Auditor's Report Thereon

The Group Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Board's report and Management Discussion and Analysis, but does not include the Secretarial Audit Report, Consolidated financial statements and our auditor's report thereon. The Board's report and Management Discussion and Analysis is expected to be made to us after the date of this auditor's report. Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance or conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

When we read the Board's report and Management Discussion and Analysis, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and make disclosures and take specific actions as per applicable laws and regulations, if required.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the matters stated in Sec 134(5) of companies Act 2013 with respect to the presentation and of these consolidated financial statements in term of the requirements of the Companies Act, 2013 (the Act) that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group in accordance with the Ind AS and other accounting principles generally accepted in India, including the Accounting Standards specified under section 133 of the Act.

accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group is also responsible for overseeing the financial reporting process of the Group.

Auditors Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our

opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieve fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Consolidated Notes to Financial Statements for the year ended 31st March, 2024

Note 1: Significant Accounting Policies

1. **Basis of preparation**

The financial statements of the company have been prepared in accordance with generally accepted accounting principles in India and comply with Indian Accounting Standards (Ind AS). The company has prepared these financial statements to comply in all material respects in accordance with the Accounting Standards notified under the Companies Act, 2013 ("the Act") and in accordance with the accounting principles generally accepted in India. These financial statements have been prepared and presented under the historical cost convention, on the accrual basis of accounting except for certain financial assets and liabilities that are measured at fair values at the end of each reporting period, as stated in the accounting policies stated out below.

2. **Summary of significant accounting policies**

a. **Use of estimates**

The preparation of financial statements in conformity with Ind-AS requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

b. **Property, Plant and Equipment**

Property, Plant and Equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discount and rebates are deducted in arriving at the purchase price.

Gains or losses arising from sale of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is sold.

c. **Depreciation on tangible fixed assets**

Depreciation on Fixed Assets is being provided on Straight Line Method on "Useful Life" in the manner prescribed under the Schedule II of the Companies Act, 2013.

d. **Borrowing costs**

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange difference arising from currency borrowings to the extent they are regarded as an adjustment to the interest cost.

e. **Impairment of tangible and intangible assets**

The company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

f. Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investment.

Current investments are carried in the financial statement at lower of cost and fair value determined on an individual investment basis. Long-term investment is carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investment.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

g. Financial Assets:

i. Financial Assets

A. Initial recognition and measurement

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognised using trade date accounting.

B. Subsequent measurement

a) Financial assets carried at amortised cost (AC)

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c) Financial assets at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

C. Other Equity Investments

All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in 'Other Comprehensive Income'.

D. Impairment of financial assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

- The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument)

For trade receivables Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward looking estimates are analysed.

The Company uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

ii. Financial liabilities

A. Initial recognition and measurement

All financial liabilities are recognized at fair value and in case of loans, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

There is no significant impact on valuation of Financial Assets at fair value through comprehensive income and hence not profit or loss on such valuation booked.

B. Subsequent measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

There is no significant impact on valuation of Financial Assets at fair value through comprehensive income and hence not profit or loss on such valuation booked.

Revenue recognition

Revenue is recognized to the extent that is probable that the economic benefits will flow to the company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Sale of goods

Revenue from sale of goods is recognized when all the risks and rewards of ownership of the goods have been passed to the buyer, usually on delivery of the goods and performance of services to customers. If company collects GST on behalf of the government and, therefore, these are not economic benefits flowing to the company. Hence, they are excluded from revenue.

Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head "other income" in the statement of profit and loss.

Dividends

Dividend income is recognized with the company's right to receive dividend is established by the reporting date.

h. Foreign currency translation

Foreign currency transaction and balances

Initial recognition

Foreign currency transaction are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Conversion

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction.

Exchange differences

The company accounts for exchange difference arising on translation/settlement of foreign currency monetary items as below:

Exchange difference arising on long-term foreign currency monetary items related to acquisition of a fixed asset are capitalized and depreciated over the remaining useful life of the asset.

All other exchange differences are recognized as income or as expenses in the period in which they arise.

i. Retirement and other employee benefits

Retirement benefit in the form of provident fund, Employee State Insurance Contribution and Labour Welfare Fund are defined contribution scheme. The contribution to the above is charged to the statement of profit and loss for the year when the contributions are due.

The company operates defined benefit plan for its employee, viz., gratuity. The costs of providing benefits under this plan are determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out for each plan using the projected unit credit method. Contribution towards gratuity fund for eligible employees is made by way of premium to Life Insurance Corporation of India and charged to the statement of profit and loss. Actuarial gains and losses, (if any) for the defined plan are recognized in full in the period in which they occur in the statement of profit and loss.

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short – term employee benefit. The company measures the expected cost of such absences as the additional amount that is except to pay as a result of the unused entitlement that has accumulated at the reporting date.

The company treats accumulated leave excepted to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The company presents the entire leave as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for 12 months after the reporting date.

Expenses incurred towards voluntary retirement scheme are charged to the statement of profit and loss immediately.

j. Income taxes

Tax expenses comprise current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted by the reporting date. Deferred income tax relating to items recognized in equity and not in the statement of profit and loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situation where the company has unabsorbed or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the company re-assesses unrecognized deferred tax assets. It recognized unrecognized deferred asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

l. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

m. Provisions

A provision is recognized when the company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefit will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

n. Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The company does not recognize a contingent liability but discloses its existence in the financial statement.

Restrictions on Foreign Ownership of Indian Securities

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will not be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs through the FDI Circular 2020 (defined below).

The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“**FDI Circular 2020**”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as at October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under the FEMA Rules will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies (“**OCBs**”) have been derecognised as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident must do so in accordance with the FDI Circular 2020 and FEMA Rules. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.
